

Ismail Bellakhel

Technical Growth Analyst | Performance Marketing Lead | Technical SEO & CRO Manager

✉ ismail.bellakhel@gmail.com ☎ +4794469676 📍 Oslo 🌐 Portfolio 🔗 LinkedIn

Summary	Technical Growth Lead working across marketing, data, and product. I help organisations scale acquisition and conversion by fixing measurement, removing technical bottlenecks, and turning data into decisions that are actually used. Experience spans News Media, SaaS, Ed-Tech, Telecommunication and Consulting, with hands-on ownership of analytics, performance marketing, SEO, and CRO in GDPR sensitive environments.

	Google Cloud / Azure	Jira / ClickUp	Hubspot / Salesforce	Aherfs / Matomo
Experience	DagensPS / Rlvnc Media Technical Growth & Marketing Analytics Lead Stockholm January 2024 - Present • Achieved 161% growth in organic traffic via Google Discover, and drove a 125% increase in ad revenue across all media brands by implementing technical, data driven SEO audit and strategies that resolved site issues and enhanced indexing, contributing to the platform winning the Svenska SEO-priset in the News Media industry. • Built automated analytics data pipelines using Python, SQL, and API integrations to collect, transform, and deliver analytics data into interactive Tableau and Looker Studio dashboards to support decision making. • Led the setup of a server side tracking approach with Google Tag Manager (sGTM) and structured data layers, coordinating with the web agency to ensure reliable first-party tracking and accurate KPI measurement. • Optimised native campaigns delivery speed by 15% by reformulating bidding logic and validating improvements through a structured series of A/B tests, boosting ad display & placement. • Expanded monetisable ad inventory to support advertising revenue growth by improving personal data consent coverage, increasing opt-in rates by ~12% and reducing opt-outs by ~18%. • Applied NLP, LLM, and RAG for content analysis and metadata enrichment, supporting GEO/AEO content structures. This gave editors clearer performance insights, more consistent metadata, and faster access to relevant content. Grow Quality Consulting Performance Marketing Consultant Stockholm April 2021 - November 2023 • Provided SEO, SEM, & CRO strategies for B2B & B2C clients in the automotive and real estate sectors across Sweden, UAE, and Canada, using structured consulting approaches in fast moving entrepreneurial environments. • Managed paid campaigns end to end across Google Search, Meta, and LinkedIn, running A/B tests to evaluate new channels and trends and analysing results with partners. • Optimised media spend and campaign targeting to improve ROAS, CAC efficiency, and ARPU, focusing on higher-value user segments and reducing costs by up to 20%. • Built analytics datasets using GA4, SQL, and Python, and delivered Looker Studio dashboards that turned complex performance data into clear insights for non technical stakeholders. ILT Education Marketing Analytics & Automation Specialist Stockholm December 2019 - December 2020 • Led CRM across the full customer lifecycle in Hubspot, building automated customer journeys, segmentation, and personalisation across email and SMS to support onboarding, retention, reactivation, and loyalty program. • Conducted a cross channel audit across social, technical and content SEO, paid search, and website funnels to understand content reach, user behaviour, and traffic quality, using API based data collection and analytics tools. • Used product updates, feature launches, and seasonal moments to shape customer communication, testing messaging and cadence through A/B tests and experiments. • Managed paid campaigns end to end across Google Ads, Meta, and LinkedIn, covering budget ownership, campaign setup, and post campaign analysis, supported by BI reporting and performance insights. Concentrix Market Insight Analyst Paris April 2014 - April 2019 • Conducted competitive market analysis for the French Telecom market using SQL based data extraction, Excel analysis, and Power BI dashboards. • Collaborated in an agile, cross functional setup with marketing, analytics, and IT teams to build a web based benchmarking tool, combining market research with Salesforce CRM data to compare competitors and track performance over time. • Built automated SQL reporting pipelines with ETL workflows to update the benchmarking tool and support Power BI dashboards for executive reporting.
